2 Serengeti National Park

Today you have the full day to explore the vast plains of this magnificent wilderness in your private landcruiser. You can choose to head out with a picnic lunch to maximize your day or come back to the camp for lunch and an afternoon siesta before heading out again on an afternoon game drive.

Between the Ngorongoro Highlands, Lake Victoria and Tanzania's northern border with Kenya stretches one of the world's last great wildlife refuges - the Serengeti. The name comes from the Maasai word siringet, meaning "endless plains". The Serengeti's 14,763 square kilometers (5,700 square miles) contains about three million large animals, many of them taking part in seasonal migrations, unparalleled in nature.

Every year, triggered by the rains, 1.3 million wildebeest, 200,000 zebra and 300,000 Thomson's gazelle gather to undertake the long trek to new grazing lands. The migration of the herbivores roughly defines the boundaries of Serengeti National Park, which is the central zone of the Serengeti ecosystem, an area that also takes in Kenya's Maasai Mara National Reserve, the Ngorongoro Conservation Area and the Maswa Game Reserve south-east of Serengeti..
